***Response to Request for Reconsideration***

This is in response to a request for reconsideration file July 21<sup>st</sup>, 2004. Claims 149-154 are being reconsidered in this action.

***Response to Arguments***

1. Applicant's arguments with respect to claims 149-154 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 149-154 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al (U.S. Patent No. 6,389,462) in view of Shore et al (U.S. Patent No. 6,564,193).

4. As per claims 149-154, Cohen et al teach an inventive method/system for distributing content using proxy comprising providing a process and web server process associated the host server, intercepting a request from a client intended for a web server, providing the intercepted request to the web server, receiving from the web server a web page in response to the request,

Art Unit: 3621

and transmitting the web page with the merged content to the client (*see abstract, figs 1-4, column 2 lines 26-65, 5 lines 32-6 line 4, 6 lines 47-67, 7 line 49-9 line 18*). Cohen et al fail to teach an incentive concept of merging with the web page content based on information in the web page reflecting a vacancy. However Shore et al teach merging with the web page content based on information in the web page reflecting a vacancy (*see claims 4 and 7*). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the inventive concept of Cohen et al's to include Shore et al's merging with the web page content based on information in the web page reflecting a vacancy because this would have facilitate message disposed at the web site in a direction transverse to the sending message.
